To Whom It May Concern:

Greg Nordfelt has been volunteering in our rehabilitation program. He helps our patients who have experienced a traumatic brain injury (and their families) cope with the overwhelming adjustments that occur in their lives following such a catastrophic event. He frequently inquires as to any needs we may have as program that he might be able to help with regarding this patient population. Monthly, he participates in our support groups for former patients and their caregivers.

Greg has a unique perspective to offer that the clinical professionals cannot. Namely, he experienced a traumatic brain injury and was a patient in our program. He made a remarkable recovery and was able to return to his former challenging professional position. He is an ambassador of hope, of determination, of resilience, and of change. He is an example of the human spirit of overcoming obstacles to achieve important goals.

Greg is an outstanding public speaker who captures his audience with his personal experiences and optimistic attitude. Audiences are always inspired when they hear him speak. His capacity to empathize, communicate the feelings of his heart and to inspire is most remarkable!

I highly recommend him to you as a person of integrity and genuine desire to be of service to others.

Yours Sincerely,

A handwritten signature in blue ink that reads 'Brad Zollinger'.

Brad Zollinger, DPT
Director Neurosciences Institute
